DML Examples

The image displays three sequential screenshots of a SQL development environment, likely SQL Server Enterprise Manager, showing different DML (Data Manipulation Language) queries being executed against the 'ELECTRONICS_RETAILER.PUBLIC' database. The interface includes a top bar with user 'ACCOUNTADMIN' and server 'COMPUTE_WH (X-Small)', and a 'Share' button. The main query editor shows the SQL code, and the bottom pane shows the results of the execution.

Query 1: DELETE

```
1 DELETE FROM Customers
2 WHERE CustomerKey = 9999;
```

Results:

#	number of rows deleted
1	1

Query Details:

- Query duration: 187ms
- Rows: 1
- Query ID: 01bc1b95-0002-02b2-0...
- Show more

Query 2: INSERT

```
1 INSERT INTO CUSTOMERS (
2   CustomerKey, Gender, Name, City, State_Code, State, Zip_Code, Country, Continent, Birthday
3 )
4
5 VALUES (
6   9999, 'Male', 'Logan Samples', 'Flintstone', 'GA', 'Georgia', 30725, 'United States', 'North America', '2002-06-10'
7 );
```

Query 3: UPDATE

```
1 Update Customers
2 SET STATE = 'Tennessee', STATE_CODE = 'TN', CITY = 'Chattanooga', ZIP_CODE = '37402'
3 WHERE CustomerKey = 9999;
```
